Forecast for Saturday 10 Jul 2021

Weather: Widespread low cloud and mist at first, away from the far west, with a chance of a little light rain or drizzle. This will lift and disperse this morning to give way to bright or sunny spells. However, showers will soon develop, with some becoming heavy and possibly thundery at times. Daytime showers will gradually ease this evening, especially after sunset.

Chance of cloud free mountain/hill tops above 600m: 60% across the far west at first and 20% elsewhere, with cloud bases down to 300-400m. Increasing to 80% chance from mid-morning onwards, but cloud bases lowering briefly with heavy showers.

Visibility: Poor or very poor visibility at first, with only near-by hills visible at low levels and with difficult navigation on the summits. Becoming good from mid-morning, with brief deteriorations in any heavy showers this afternoon.

Valley	15/15	17/16	18/18	19/18	18/18	16/16	14/14
Freezing Level*	2700m	2700m	2700m	2800m	2800m	2700m	2600m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Moderate to perhaps high UV levels on Saturday, where any sunnier breaks develop, especially in between the showers, so adequate protection is still recommended. Pollen levels will be high.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sat 10 Jul 2021	1mm	1mm	3.6mm

Forecast for Sunday 11 Jul 2021

Weather: Overnight will be cloudy and misty, with low cloud on the summits. Low cloud and mist will soon lift and disperse during Sunday morning with some bright or sunny spells developing. However, scattered showers will soon break out, which are likely to become heavy, slow moving and possibly thundery at times.

Maximum wind: Southwesterly 5-12 mph

Chance of cloud free mountain/hill tops above 600m: 20% chance during the morning, with cloud bases down to 400m or so, increasing to 80% by the afternoon, with brief deteriorations in any heavy showers in the afternoon and evening.

Visibility: Poor in low cloud and mist first thing. Becoming good during the morning as any cloud lifts off the summits, with distant peaks visible, albeit rather hazy. Temporary reductions to poor or moderate in heavy showers during the afternoon.

Temperature: **Valleys:** Plus 14 Celsius, becoming plus 20 Celsius.
At 600m: Plus 11 Celsius, becoming plus 15 Celsius.
Freezing level: Well above the summits.
